WEIBANG[®] THE PROFESSIONALS CHOICE

WEIBANG®

About WEIBANG®

Maximum reliability and the highest level of performance, even in extreme conditions, this is the hallmark of WEIBANG machines. Every detail of a WEIBANG machine is designed to last, with heavy duty, professional quality components and the highest quality materials. A WEIBANG machine is designed to be a part of your life, for life.

Comprehensive Warranty

WEIBANG products feature a comprehensive 5 year domestic warranty across the product range, offering true peace of mind for your investment. The WEIBANG PRO models feature an industry leading 3 year commercial warranty. All warranty is subject to annual servicing, ensuring your product always performs to the highest standards. The aluminium cutter deck also features a 25 year warranty, proving the quality of workmanship.

Dealer Network

WEIBANG dealers are happy to provide you with advice on selecting the right product to meet your needs. They can also give you useful tips on using the machine correctly as well as offering you a professional service and a full spare parts backup. This gives you the assurance that your WEIBANG machine will be a pleasure to use for many years.

LEGACY Rear Roller Lawnmowers Page 3

The LEGACY aluminium deck range of rear roller lawnmowers, is specifically designed to give the finest quality, striped finish to your lawn. Incorporating a host of features and manufactured from the highest quality components, the range is designed to last a lifetime. With options such as Vari-Speed gearbox, electric start, and blade brake clutch, there is a perfect machine for any garden.

DESIGNED FOR THE **BRITISH LAWN**

LEGACY PRO Rear Roller Lawnmowers Page 7

The LEGACY PRO aluminium deck range of rear roller, rotary lawnmowers is designed specifically for the professional user, with a host of commercial features, such as a heavy duty, professional, 3 speed gearbox, deck protection and full handle anti vibration. The LEGACY PRO range also features an industry leading, 3 year commercial warranty and Kawasaki engines.

DESIGNED FOR THE **BRITISH LAWN**

VIRTUE Aluminium Deck Lawnmowers Page 9

The VIRTUE aluminium deck range of 4 wheeled, rotary lawnmowers is manufactured with a high quality, cast aluminium cutter deck, designed for optimum airflow and collecting ability. Suitable for the homeowner who demands the highest quality, the VIRTUE aluminium deck range, is exclusively powered by premium, Briggs & Stratton engines and features a heavy duty, vari-speed gearbox.

VIRTUE PRO Aluminium Deck Lawnmowers Page 11

The VIRTUE PRO aluminium deck range of 4 wheeled, rotary lawnmowers is designed specifically for the professional user, with a host of commercial features, such as a heavy duty, professional 3 speed gearbox, outer and inner deck protection and full handle anti vibration. The VIRTUE PRO range also features an industry leading, 3 year commercial warranty, making this the professionals choice. The PRO range is powered exclusively by Kawasaki engines.

VIRTUE Steel Deck Lawnmowers Page 13

The VIRTUE steel deck range of 4 wheeled, rotary lawnmowers combine premium quality in an affordable package. With a comprehensive 5 year domestic warranty, these machines are suitable for homeowners and contractors alike. All powered by premium, Briggs & Stratton engines, the VIRTUE steel deck range offers exceptional value for money.

Garden Maintenance Page 15

WEIBANG manufacture a range of high quality garden care products in addition to their high quality lawn mower range. These help to ensure your garden is always in peak condition. The range includes scarifiers, aerators and stump grinders, which are all manufactured to the highest levels of quality. All models are powered by premium, Briggs & Stratton engines and are designed to last.

LEGACY FEATURES

DESIGNED FOR THE
BRITISH LAWN

COMFORTABLE

For 2015, the Legacy features a newly designed comfortable and ergonomic handle.

ROBUST QUALITY

Heavy duty adjustable handle brackets with integrated Anti-Vibration Technology. Designed for ease of use, a long life and user comfort.

COLLECTION

The collector features an integrated air-flow fabric, which indicates when the collector is full. Pro models feature an extra large 85L collector

EXCLUSIVE ROLLER DESIGN

The rear roller is robotically welded, to ensure the highest levels of quality and consistency. A world first features on the 2015 Legacy, in the form of a new roller ratchet system, with 10 times more strength and durability than rival models.

NEW WEIBANG® CPS (Crankshaft Protection System)

Due to the demands of cutting at low heights, the increased risk of hitting objects and damaging the blade and crankshaft is greater. The NEW Legacy features a CPS (Crankshaft Protection System) to avoid accidental and costly damage.

CLEAR CONTROLS

The newly designed operator controls, have been specially grouped together in one place, for ease of use.

PREMIUM POWER

The Legacy range is powered by Briggs & Stratton engines, while the Legacy PRO range is powered by Kawasaki FJ180V-AM74 engines. The Legacy 48 features a 750EX DOV and new 775 instart engine.

SINGLE CUTTING HEIGHT ADJUSTMENT

The cutting height can be changed conveniently using a spring-assisted hand grip, from 13 -75mm.

EASY STORAGE

The newly designed handles are fully height adjustable and feature a storage and service position.

HIGHEST QUALITY WHEELS

Premium quality, cast aluminium wheels, with double ball bearings and a high traction rubber tyre.

25 YEAR DECK GUARANTEE

The Legacy aluminium range features a 25 year guarantee on the cutter deck.

UNDER CONTROL

Integrated front grass fins allow airflow to the deck, ensuring maximum performance, even at low cutting heights.

Why choose a LEGACY?

The Weibang® Legacy has been designed from the ground up, with 3 key factors in mind - Quality of finish, Performance and Reliability. The key to the unrivalled striped finish of the Legacy is its perfect weight distribution. The engine and cutter deck make up the majority of the weight of the machine, however the key to the perfect striped finish is to have enough weight directly over the rear roller. Through extensive R&D and thousands of hours of testing, the Legacy offers the perfect balance for performance, leaving an unrivalled striped finish from a rear roller lawnmower.

DESIGNED FOR THE
BRITISH LAWN

The LEGACY range features an innovative extra heavy duty roller ratchet, that is up to 10 times stronger than its competitors. The Weibang Legacy is built to last, for both consumers and commercial users.

The LEGACY PRO series features a heavy duty professional, 3 speed gearbox, that is designed to last a lifetime.

The heavy duty handle structure is designed with 3 key factors in mind - Perfect for any height, easy to transport, low levels of vibration. As an added bonus, the Legacy features an upright service position, for easy and safe access to the underside of the cutter deck.

All models feature integrated grass channels, which guide grass into the cutter deck and allow for optimum airflow which gives exceptional collecting performance. The PRO models feature additional features, such as a front bumper, inner deck protection and a 3 year commercial warranty.

For the Demanding Professional

Designed for parks, gardens and estates to provide a formal, high quality, striped finish, the LEGACY PRO range can cut down to 13mm. A rear steel, split roller ensures easy manoeuvring, with a rear scraper bar to protect it and a heavy duty, sprung, one handed, single cutting height adjustment makes alterations effortless. Aluminium deck with side bumpers to protect the cutting deck and inner steel deck liner add to the commercial appeal and a heavy duty, professional, 3 speed gearbox, ensures these mowers are of a premium quality and are designed to last, be that for the discerning homeowner or commercial user. The LEGACY PRO also features an unrivalled 3 year commercial warranty.

Aluminium cutter decks are designed to last, with fantastic sound and vibration damping and anti corrosion properties, the VIRTUE aluminium cutter deck is of the highest quality available. The special design of the aluminium cutter deck allows for optimum airflow and collection.

All models in the VIRTUE aluminium deck range feature a heavy duty, vari speed gearbox. The user can adjust the forward speed to suit their needs around the area being mown, giving flexibility and making mowing the lawn a pleasure rather than a chore.

An innovative anti vibration handle system ensures comfort during use, due to the upper handles being isolated from the cutter deck by rubber inserts. The handles also offer full height adjustment to suit the operator.

The VIRTUE aluminium deck models feature fully cast, aluminium wheels, with double ball bearings and a rubber tread. The wheels are extremely heavy duty and are designed to last as well as being gentle on the lawn and easy to push.

For the Homeowner that Demands the Best

The VIRTUE Aluminium deck range of lawnmowers, offers the highest quality available to the homeowner. All models have anti corrosion properties and improved sound and vibration damping. All models have a heavy duty, Vari speed gearbox, allowing the user to adjust the forward speed to suit the area being mown. Cast aluminium wheels offer strength as well as being gentle on the lawn. Anti vibration handles ensure user comfort. A VIRTUE Aluminium Deck Lawnmower will offer years of performance and make cutting the lawn a pleasure not a chore.

PRO Model Only

The VIRTUE PRO series features a heavy duty, professional, 3 speed gearbox that is designed to last a lifetime.

A long life is essential for a professional product and this is achieved through a heavy duty front bumper, aluminium side skirts and a steel inner deck liner. All of which protect the WEIBANG PRO from bumps during transport or use.

Anti vibration is a key factor for professional use and the VIRTUE PRO range features a heavy duty anti vibration handle system, which isolates the upper handle from the cutter deck, making for comfortable use.

The VIRTUE 53 PRO BBC is fitted with a blade brake clutch, which disengages the drive to the blade as the operator releases the safety handle. This therefore enables the operator to leave the engine running, but without the blade rotating, increasing safety and productivity.

The Professionals Choice

The VIRTUE PRO range comes with a host of features; aluminium decks with steel inner liner and front bumper, to protect from bumps during use or transport, a three speed, heavy duty, professional gearbox designed to last and heavy duty, anti vibration handles. With an industry leading 3 year commercial or 5 year domestic warranty (subject to servicing) for peace of mind, these are the mowers of choice for discerning homeowners, with large areas to maintain, or commercial users that rightly demand quality mowers that are designed to last.

The VIRTUE 46 SM and 53 SV feature mulching and side discharge functions, giving true versatility around the garden. Mulching is increasingly popular, due to the fact there are no grass clippings to dispose of and side discharge is ideal for longer grass areas.

The VIRTUE cutter deck is pressed from high quality steel and finished in a long lasting silver finish. The deck is designed for a long life and optimum performance for collecting, mulching and side discharge, depending on the model.

The VIRTUE range is designed ergonomically and with storage in mind. The handles are easily folded to store the machine in a vehicle, garage or shed if required.

The VIRTUE 53 SV features a fully ergonomic dashboard, which houses the controls for the throttle and for the vari speed gearbox. Comfortable to use and built to last, the dashboard is made of high quality materials.

Commercial Quality for Homeowners

For the quality conscious consumer, who demands performance, durability and value. The VIRTUE range of steel deck lawnmowers offers just that. The VIRTUE cutter deck is pressed from high quality steel and is designed for a long life and performance. The range features tried and tested Briggs & Stratton engines and a 5 year domestic warranty (subject to annual servicing). The VIRTUE Steel Deck range offers quality at an affordable price.

Scarifying is the process of cutting into the surface of the lawn to remove moss and thatch, allowing water, sunlight and nutrients to reach the grass roots and give a healthy green appearance to the lawn.

The swing blade design offers minimal maintenance, due to its ability to strike objects without bending or breaking. An optional fixed blade cassette is also available.

The working depth can be adjusted via the height screw, to find the perfect depth and the transport lever enables the user to raise the blades from harms way during transport around the garden

Premium power is provided by high quality Briggs and Stratton engines.

| For a Healthy Green Lawn

Controlled by a clutch system, the scarifying rotor is fitted with 28 double tipped, carbon steel blades. Raking depth is fully adjustable to a maximum height of 7cm, to remove moss and thatch and aerate roots gently but effectively. Powered by an easy to start, reliable, 5hp Briggs & Stratton engine, the WEIBANG scarifier range has a maximum 46cm working width.

The pressed steel body has a hard wearing, powder-coated finish and is extremely durable, ensuring your product lasts.

GARDEN MAINTENANCE

Lawn Aerator

Intensive Grass Care

Most lawns are subject to the problem of soil compaction, which makes it difficult for the grass roots to breathe. The WEIBANG lawn aerator, improves drainage and relieves compaction in the soil. It also breaks up old roots to promote the growth of new ones.

The hollow tined working head of the WEIBANG aerator is designed to work at a depth of 7cm, to penetrate the soil down to the grass root.

Aeration is the process of penetrating and removing soil from the lawn, all the way down to the roots. This not only reduces compaction but has other health benefits also.

The open core goes all the way to the roots of the grass, allowing nutrients, water and light to penetrate the ground, resulting in a healthier lawn.

| Make Tree Stumps Disappear

Tree stumps are difficult to remove without the use of heavy plant equipment, which damages the ground. The WEIBANG stump grinder makes light work of almost any tree stump, grinding it below the surface of the ground, 8-tooth, hardened tipped cutter disc. With minimal ground damage, compared to excavation equipment, the area will look in peak condition in no time.

The large 355mm cutter disc features 8, heavy duty, hardened steel teeth that make light work of any tree stump.

To remove the stump thoroughly, the handle can be adjusted to grind at different depths.

A special brake stops one of the two wheels, allowing the cutter head to swing from side to side, for more efficient grinding.
